

# Super efficient anti-back staining agent AB-6

## INTRODUCTION

Super efficient anti-back staining agent AB-6 is a water dispersible polyester polymer in powder form. The product is designed for an anti-back staining agent in the garment wet processing process for denim. The product can be used directly in a powder enzyme formulation or can be dispersed in water prior to use.

## Physical and Chemical Specification

Appearance	White powder
Ionic Character	Nonionic
Miscibility	Dispersible in water

## Advantages

1. Has high dispersing effect
2. Prevents re-deposition of indigo in denim processing
3. Produces the best salt pepper effect when combined with cellulase in denim fading.
4. Compatible with cellulase and improve denim fading.
5. Effective washing off agent to remove back stain from processed denim.
6. Anti-back staining effect last for a long time.

## Direction for Usage

1. pH: 5.0-8.0; Temperature : 20°C - 80°C, time: 30-60 min, ratio: 1:6~1:10
2. Dosage: the dosage of desizing, abrasion washing and polishing is 0.15 -0.3% (o.w.f.), namely one machine (in 100 pairs of jeans) dosage is about 80g -100g. The actual amount can be adjusted according to the customer.  
Formulation in cellulase powder dosage: 5%-15%.
3. Dilution with water: Can be diluted from 1 to 3-5.

## **Packing**

25 kg drums.

## **Storage and Safety**

Store at 20°C under dry, shaded and cool condition and avoid high temperature and direct sunlight. Shelf life: 24 months.
